Il ciclo produttivo prevede l'utilizzo esclusivo di materie prime di qualità superiore, rispondente alle rigorose norme UNI-CEE.

Il centro Ricerche è dotato di laboratori di prova ed analisi per studi ed acquisizioni d'esperienze su problematiche meccaniche, chimiche e funzionali.

La produzione è completamente interna ed a ciclo completo, con ampio utilizzo di tecnologie moderne su macchine transfer e multimandrino. I controlli di qualità sono eseguiti in tutte le fasi di produzione e lavorazione da quelle principali a quelle aggiunte. A questo scopo sono utilizzati anche strumenti automatici, programmati secondo precisi protocolli di valutazione per ogni lavorazione.

La pulitura finale dei pezzi può essere robotizzata come manuale, a seconda delle problematiche di produzione e del livello di finitura di ogni singolo pezzo. L'impianto di cromatura è uno dei più grandi del mondo nel settore della rubinetteria. Assicura lo standard di spessore delle cromature richiesto dalle normative internazionali. I singoli pezzi viaggiano su telai trasportati per via aerea su birotella elettromeccanica.

La verniciatura avviene internamente con procedimenti di copertura sia a polvere epossidica che a liquido. Particolarmente apprezzabile l'impianto a trattamento PVD, impianto che permette di ricavare finiture più resistenti a quelle tradizionali.

I nostri prodotti rispondono agli standard internazionali di molti enti d'Unificazione ed è una delle poche aziende italiane del settore a disporre per i prodotti dei marchi d'omologazione IAPMO validi per gli USA.

NORME INTERNAZIONALI

I prodotti Jacuzzi sono realizzati nel rispetto delle rigorose norme internazionali che prevedono l'utilizzo di materie prime di qualità superiore, il controllo sul processo produttivo e l'analisi sul funzionamento di ogni singolo prodotto, garantendo così qualità e sicurezza.

Tutti i nostri articoli sono accuratamente provati, controllati e garantiti per sette anni dalla data della fatturazione.
